

# Foreword and Editorial

## International Journal of Advanced Research in Computer and Information Security (IJACIS)

We are very happy to publish this issue of an International Journal of Advanced Research in Computer and Information Security by Global Vision School Publication.

This issue contains 2 articles. Achieving such a high quality of papers would have been impossible without the huge work that was undertaken by the Editorial Board members and External Reviewers. We take this opportunity to thank them for their great support and cooperation.

The paper entitled, “Security System Model to Prevent Exposure of Privacy between Users of Sharing Economic Platform”, recently, as the sharing economic market has grown, various studies and developments have been made to apply the ICT(Information Communication Technology) based sharing economic system. In this paper, to solve the risk of exposure of personal information between users, which is not considered in the existing sharing economic platform, we developed a system model and a detailed algorithm that can increase the security of the system by applying the blockchain technique.

In the paper “Studies on the Various Issues Relating to Data Storage space and safety in Cloud Computing”, dispersed registering has been imagining as the bleeding edge outline of IT undertaking. Disseminated registering shift the submission programming and information places to the gigantic server ranches, where the organization of the data and organizations may not be totally tried and true. This positions various novel safety confront which contain totally realized. In this paper, we generally spotlight on perspectives for offering safety to information accumulating in dim, furthermore building for information amassing that are realized by additional expert centers dealers in dim, key concentrations for showing safety for further information storing.
