Publication and Update

Last day of June and December

Journal Aims

Our Journal provides a chance for academic and industry professionals to discuss recent progress in the area of computer-aided mechanical design and implementation.

To bridge the gap of users who do not have access to major databases where one should pay for every downloaded article; this online publication platform is open to all readers as part of our commitment to global scientific society.

Journal Topics

The main topics include but will not be limited to: (Excellent surveying works, summary or introduction of new or fresh idea in these areas are welcome, too).

- Advanced CAE Technique
- Complex Electro-mechanical System Design
- Computer Aided Design, Product Design
- Design for Manufacturing, Axiomatic Design
- Design for Sustainability
- Design theory and Applications
- Driven Train Mechanisms
- Green Design and Manufacturing
- Innovative Design Methodology
- Intelligent Optimization Design
- Machinery Dynamics
- Optimization of Design
- Product Life Cycle Design
- Structural Strength and Robustness
