Publication and Update

- Last day of March and September

Journal Aims

Our Journal provides a chance for academic and industry professionals to discuss recent progress in the area of human and smart device interaction.

To bridge the gap of users who do not have access to major databases where one should pay for every downloaded article; this online publication platform is open to all readers as part of our commitment to global scientific society.

Journal Topics

The main topics include but will not be limited to: (Excellent surveying works, summary or introduction of new or fresh idea in these areas are welcome, too).

- Human-Smart Device interaction
- Interface design and universal design/access
- Predictive models and theories of interaction
- Adaptive and intelligent systems
- Speech, graphic, haptic, and multimodal interaction
- Mobile, wearable, and ubiquitous computing systems
- Computer mediated communication methods and systems
- Virtual, mixed, and augmented reality interfaces and systems
- Agent-based interfaces and systems
- System and user evaluation studies
