Publication and Update

Last day of June and November

Aim and Scope

The International Journal of Neural Systems Engineering (IJNSE) provides a chance for academic and industry professionals to discuss recent progress in the area of neural systems engineering.

To bridge the gap of users who do not have access to major databases where one should pay for every downloaded article; this online publication platform is open to all readers as part of our commitment to global scientific society.

Journal Topics

The main topics include but will not be limited to: (Excellent surveying works, summary or introduction of new or fresh idea in these areas are welcome, too).

- Artificial Neural Networks
- Cognitive Science
- Coping with hidden states in reinforcement learning
- Engineering and Applications
- Learning Systems
- Machine Learning, Neural and Statistical Classification
- Mathematical and Computational Analysis
- Modular neural networks
- Neural coding
- Neural gas
- Neural machine translation
- Neural network models
- Neural network software

- Neural networks and fuzzy systems
- Neural Networks Applications
- Neuroevolution
- Neuroscience
- Neuroscience
- Policy iteration methods of reinforcement learning

Advisory/Editorial Board

- Angelo Genovese, Università degli Studi di Milano, Italy
- Carlos León de Mora, University of Seville, Spain
- Fuhua Oscar Lin, Athabasca University, Canada

Editorial Secretary

- Lyn Ruiz Curio
- Haiying Wang
- Yuyu Yin
- Zhipeng Fan
