

Foreword and Editorial

International Journal of Reliable Information and Assurance

We are very happy to publish this issue of an International Journal of Reliable Information and Assurance by Global Vision School Publication.

This issue contains 1 article. Achieving such a high quality of papers would have been impossible without the huge work that was undertaken by the Editorial Board members and External Reviewers. We take this opportunity to thank them for their great support and cooperation.

In the research “Offensive Cyber Security Strategy according to the Evolution of Cyber Attack Technology”, it is impossible to guarantee continuous cyber security because of the advent of new information technologies and the innovative evolving cyber attack technology. Cyber security strategy should be planned considering the change of cyber space environment and new functions of cyber attack tools, assuming that new science technology and ICT are applied to cyberspace. In this paper, we proposed the offensive cyber security strategy in aspects of strategic, tactical, and operational level based on the analysis of cyberspace environment and the functions of cyber attack technologies.
