### 7.4. Correlation

Number of Registered units	Employment (numbers)
9021.0	205233
12258	102381
23348	582036
16393	491990
13104	65180
12136	81515

$$= 0.822507418$$

### 7.5. Interpretation

The connection for the enlisted units and the business number was = 0.822507418 it is the positive connection to the Andhra Pradesh state. In this, there is the independent variable development (x) and the dependent variable employment (y).

1. In this, there is a positive relationship.
2. By the positive relationship, it gives the great outcomes in the benefits.
3. It additionally demonstrates the great development in the employee's development.

### 8. Conclusion

Small and medium undertakings (SME'S) add to monetary advancement in different courses, for example, making business open doors for provincial and urban individuals, giving products and ventures at reasonable cost by offering new imaginative arrangements and maintainable advancement to the economy in general. SME'S in India confront various issues - nonappearance of satisfactory and convenient keeping money finance non-accessibility of appropriate Technology, in successful promoting because of restricted assets and non-accessibility of gifted labor. The miniaturized scale little and medium enterprisers segment contributes altogether to assembling yield, employment, what's more, fares of the nation. It is assessed that as far as esteem, the segment represents around 45% of the assembling yield and 40% of aggregate fares of the nation. To make this part wind up more dynamic and critical player in the improvement of the Indian economy the administration of India has taken different activities. The definition and scope of the MSME area were widened MSME improvement act 2006 which perceived the idea of big business to incorporate both assembling and administration area other than characterizing medium ventures setting of a board for creating approach outline works and demonstrating acquisition strategy.
