### **Publication and Update**

Last day of April and October

### **Aim and Scope**

International Journal of Wireless and Mobile Communication for Industrial Systems (IJWMCIS) provides a chance for academic and industry professionals to discuss recent progress in the area of wireless and mobile communication for industrial systems.

To bridge the gap of users who do not have access to major databases where one should pay for every downloaded article; this online publication platform is open to all readers as part of our commitment to global scientific society.

### **Journal Topics**

The main topics include but will not be limited to: (Excellent surveying works, summary or introduction of new or fresh idea in these areas are welcome, too).

- Wireless Communication Networks for Industrial Systems
- Cognitive Radio Networks for Industrial Systems
- Wireless Sensor Networks for Industrial Systems
- Mobile Ad hoc Networks for Industrial Systems
- Wireless Mesh Networks for Industrial Systems
- Vehicular Networks for Industrial Systems
- Delay Tolerant Networks for Industrial Systems
- Heterogeneous Networks for Industrial Systems
- Internet of Things for Industrial Systems

- Cloud Computing for Industrial Systems
- Mobile Computing for Industrial Systems
- Network Economics for Industrial Systems
- Wireless Routing Protocols for Industrial Systems
- Mobility Modeling and Management for Industrial Systems
- QoS Management for Industrial Systems
- Routing and Multicasting Protocols for Industrial Systems
- Performance Analysis and QoS Provisioning for Industrial Systems
- Self-organizing Network for Industrial Systems
- Modeling, Simulation and Performance Analysis for Industrial Systems
- Power-aware Architectures and Protocols Design for Industrial Systems
- Security Solutions for Industrial Systems
